

TRASSIR TODAY

Why TRASSIR?

Compatible with 99% of cameras

NVRs and analytics are compatible with 99,9% of IP-Cameras. Connection options include:

- Native integration (manufacturer protocol)
- ONVIF
- RTSP connectivity

Highly customizable

Complete customization for specific projects using rules and Python scripts

Easy predictable TCO

Lifetime licensing, firmware updates, free technical support

Pre-sale demo and training

Our engineers demonstrate system functions and conduct training sessions and webinars

Technical project supervision

Dedicated technical manager on project base

Turnkey solutions

Complete end-to-end video surveillance systems of any size

Privacy, protection of personal information and data

Client-server architecture with flexible access rights configuration for owner, administrators, operators, managers.

Archive can be encrypted. So that only the password owner can access it.

All network connections, including video stream transferring, are protected with SSL and TLS protocols.

WIDE RANGE OF SOLUTIONS FOR VARIOUS INDUSTRIES

NEURAL NETWORKS

ARTIFICIAL INTELLIGENCE

MACHINE LEARNING

Stable software to manage monitoring and video surveillance systems for businesses of any size

- Internal scripting system with nearly unlimited system automation capabilities
- Convenient and adaptive interface that can be customized to fit tasks
- Configure devices, cameras, and video recorders in the TRASSIR interface
- Flexible user rights management system
- Integration with access control systems, security and fire alarm systems, intercom, etc.

- Simultaneous video recording on multiple hard drives
- Record, export, and view streams in multi-threading mode
- Interactive maps
- Send push notifications to email, Telegram, Mobile application and TRASSIR Cloud
- Failover

- Compatible with 99% of IP cameras on the market: ONVIF, RTSP supported
- Automatic performance monitoring
- Easy access via client apps for web, desktop and mobile
- API/SDK/Access to SQL DB for integration with other systems
- Archive and stream encryption

TRASSIR VMS advanced features

TRASSIR OS on TRASSIR servers: video surveillance server performance and security

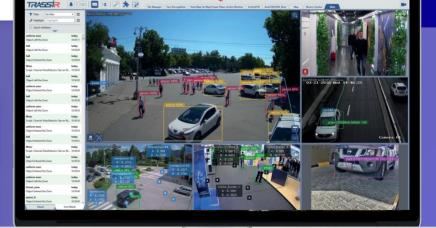

TRASSIR CMS: extensive video surveillance system management solution for large scale projects

Video analytics processing on GPU for maximum return on investment

Quick and efficient event search in the archive

Advanced neural network video analytics

VMS core licenses

Extend your VMS functionality with the following features

TRASSIR
NETSYNC INT

Archive synchronization from other TRASSIR servers

TRASSIR PACS INT

Physical Access Control and Management System on the TRASSIR platform.

Integration with ACS and Fire Alarm systems

Integration with 3rd party ACS and Fire alarm systems (ask your manager for available integrations)

NEURAL NETWORKS

ARTIFICIAL INTELLIGENCE

MACHINE LEARNING

Face Recognition Solutions

TRASSIR Face Recognition INT

TRASSIR Theft Prevention INT

intelligent face recognition and search module using a pre-configured database of people (residents, staff, etc.).

- 99,8% accuracy
- Prevent access by unauthorized people to the facility
- Obtains facial attributes for advanced analytics and searches based on specific parameters (race, age, sex, hair colour, beard, moustache, glasses, headwear, protective mask, etc.)
- The face database can be accessed from a local or remote TRASSIR server with options to copy, import, and synchronise the face database
- Intergration with ACS
- Attendance and shift monitoring

Win64 available | Per channel

has a single web interface for managing a database of offenders for retail store chains (TRASSIR servers). Stores video evidence of incidents, and maintains a record of the amount of losses incurred by each person.

Module functions:

- Recognition of faces and other attributes of appearance;
- Easy search and uploading of evidence base
- Quick alerts:
- Availability of the thieves database at all retail outlets
- Using offload analytics

The functionality allows you to blur people's faces when exporting video from the archive. One license for 1 server.

Win64 available | Per channel

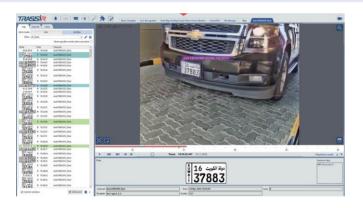

Per server

AutoTRASSIR+ INT

is designed to automatically recognize license plates in the camera's field of view

- Highly accurate license plate recognition
- Identifies vehicle class: motorcycle, passenger car, minivan/van, truck, bus
- Recognizes two-line numbers
- · Recognizes license plates in difficult conditions
- 25 countries supported including GCC
- Quick search of license plate numbers in archive
- Real-time banned/approved vehicle identification list and notifications
- Average speed calculation between two cameras
- Integration with camera-based LPR cameras (ask your manager for specific models)

Win64 available | Per channel

AutoTRASSIR (LPR) Solutions

AutoTRASSIR Parking INT

designed to monitor the number of vehicles in the parking area

- Records cars entering and leaving the parking lot and saves the vehicle number, photo, and exact time of entry and exit;
- Calculates the length of time vehicles spend in the parking lot;
- Displays information about current parking status and history of vehicles on the operator's screen.
- Based on the data received, TRASSIR Parking generates a list of vehicles with their exact time and date of entry/exit.

Win64 available | Per channel

TRASSIR Neuro Counter+ INT

an intelligent video detector that counts unique objects in a specified area

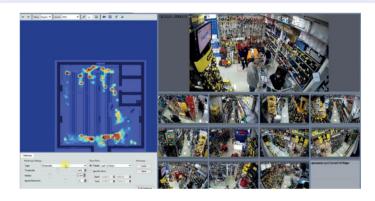

- Counts people, cars and bicycles
- Counts objects crossing a designated line up to 16 lines per channel can be supported simultaneously
- Includes detection of any movement toward prohibited areas by people, cars, or bicycles
- Automatic reporting on: number of people, minimum time spent in the crowd, etc
- Highly accurate object recognition
- Monitor the distance between people in public places

Per channel

People Detection Solutions

TRASSIR Heat Map on Map INT

an advanced thermal image analysis technology

- Kinetic map shows areas with high foot traffic
- Stationary map shows areas where people are more likely to stop
- Trajectories approximate directions of movement on the map

TRASSIR Queue Detector+ INT

an intelligent video analytics system using neural networks designed to count the number of people in a queue

- Automatic reporting on the number of people in the queue and time spent there
- Notification module for when specified queue length is exceeded

Per channel

People Detection Solutions

TRASSIR Pose Detector INT

detects and classifies people's postures. For instance, it can help identify and track unusual behavior

Currently supports recognition for the following set of poses:

- ✓ sitting
- ✓ lying down
- ✓ raised right hand

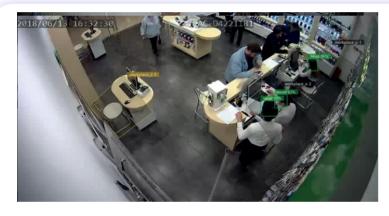

- ✓ bending over ✓ raised left hand ✓ both hands raised

The detector can be trained to recognize other poses if necessary

TRASSIR Workplace Detector INT

tracks a person's absence from the workplace

- Alarm notification in cases of worker absence
- Daily reporting on employee's real time on- and offsite

Per channel

Work Safety Solutions

TRASSIR Face Mask Detector INT

- Monitors compliance with use of personal protective equipment in conditions of increased epidemiological danger
- Sends real-time notifications if someone is detected without a protective mask in the camera's field of view.

TRASSIR Staff Tracker INT

allows employee work performance to be inspected to improve customer service

- Tracks the presence of required personnel in service areas
- Keeps a record of customers left unattended, reports on service
- Real time alerts when customer service standards are not met

Per channel

Work Safety Solutions

TRASSIR Heat Map on Map INT

an advanced thermal image analysis technology

- Kinetic map shows areas with high foot traffic
- Stationary map shows areas where people are more likely to stop
- Trajectories approximate directions of movement on the map

TRASSIR ActivePOS+INT

intelligent cash control module

- Helps decrease both planned and unplanned POS losses
- includes more than 60 detectors for predefined loss scenarios. These include: cashier fraud, cashier error (unintentional losses), sub-par service standards, violations of cash management service regulations (determined by law). Generates reports on: total losses (divided by cashier or cashbox), cashier, and analyst KPIs. Requires connection with cash register system. Integration with third party **POS** systems

Win64 available | Per 2 channel

Point Of Sales Solutions

TRASSIR ActivePOS Weight INT

Helps control products by weight in FMCG retail: automatically track whether all weighed goods pass through the cash registers (the duration is customizable; for example, within 24 hours). The application generates reports containing: product name, weighing terminal + weight, cash terminal + cost and weight by check, links to video archive, weighing time and scanning time at checkout. Requires ActivePOS module on the store's cash registers and scales.

Win64 available | Per server

Warehouse Stock Solutions

TRASSIR ActiveStock+ INT

used for event-based video monitoring of warehouse operations

- Provides regulation of potential disputes, determines responsibility for availability of goods, and investigates cases of damage in the warehouse
- Offline and online monitoring available
- Event search: reporting document numbers, product name, quantity, cell ID, pallet, customer or organization name, and more

Win64 available | Per 2 channel

TRASSIR ArUco Detector INT

TRASSIR ArUco Detector allows you to recognize ArUco-markers applied to objects. It can be used as an auxiliary tool for accounting in warehouse complexes, logistics distribution centers, production facilities, etc.

Using ArUco markers detector it is possible to do a quick search in the archive and keep records of types of goods, pallets, and any production blanks or spare parts.

ArUco markers can be created within TRASSIR VMS

Win64 available | Per channel

Object detection Solutions

TRASSIR Bag Counter

a module that automatically counts bags or other similar objects on the conveyor belt

- Eliminates errors associated with manual counting of shipped goods, resulting in a reduction of financial losses due to error or staff fraud
- In addition, the module can automate the process of shipping a specific amount of goods. The operator can enter the necessary number of items for shipment. After goods are unloaded, the conveyor stops automatically

Win64 available | Per 2 channel

TRASSIR Left Object Detector

designed to detect abandoned and forgotten items.

Detect third party interactions with the object. The detector determines the class of abandoned object: suitcase, backpack, box (and objects similar in shape), bag, duffle (large sports bag), or handbag (usually a small lady's bag)

Win64 available

TRASSIR VIDEO CAMERAS

TRASSIR's vast experience and deep understanding of both the security systems market and the needs of its customers have enabled us to create a truly advanced line of TRASSIR cameras to meet the high demands of users. All TRASSIR products can be successfully implemented at facilities of any scale

Value for money

 Advanced video surveillance technologies at affordable prices from budget segments to advanced levels

Quality image

- Up to 120db True WDR
- Up to 0.001 Lux sensitivity
- Up to 8MP resolution

Cutting-edge technology

- High-performance
- last-generation codecs (H.265, H.265+);
- Full-color night recording without switching to black-and-white mode (FTC cameras);
- Hardware analytics.

TRASSIR Video Cameras. Eco line

Affordable cameras with basic features - a line for typical video surveillance tasks

- ✓ Resolution 2MP/4MP
- ✓ Hardware analytics
- ✓ Indoor/outdoor models

- ✓ Affordable price
- ✓ 2 years warranty

TRASSIR Video Cameras. Trend line

Professional video cameras for various task levels line for security and monitoring in complex systems

- **Resolution 2MP/5MP/8MP**
- Two-way audio
- **Basic hardware analytics**

- **Built-in archive: recording reliability**
- 5 years warranty

TRASSIR Video Cameras. Pro line

High-performance video cameras with a wide range of features - line for major projects

- ✓ High image quality
- ✓ Two-way audio
- ✓ Basic/advanced hardware analytics

- ✓ Built-in archive: recording reliability
- ✓ Option to integrate with access control systems
- √ 5 years warranty

TRASSIR Video Cameras. Ultra line

High-performance video cameras with a wide range of features line for major projects

- High image quality
- Two-way audio
- **Basic/advanced hardware analytics**
- **Built-in archive: recording reliability**
- Option to integrate with access control systems
- **AutoIRIS**
- 5 years warranty

Line of network servers

UltraStation series

Number of cameras:

Up to 256

Support:

All TRASSIR analytics modules RAID 0, 1, 5, 6, 10, 50, 60 HotSwap Redundant power supply units HotSwap HDD 3.5" Connect up to 2 UltraStorage

Actual archive size:

38.2TB - 465.66TB

Comes with:

16/24/36 HDD 3.5" 2 power supply units **TRASSIR Neuro Detector** Camera licences

Neuro Station series for analytics

Number of cameras:

16/32/48/64/128/160

Support:

All TRASSIR analytics modules Up to 4K resolution H.265+/H.265/H.264 MPEG4

Comes with:

TRASSIR Neuro Detector

MiniNVR series

Number of cameras:

4/8/16/24/32

Support:

With/without PoE H.265+/H.265/H.264 MPEG4

Comes with:

AnyFree/AnyIP camera licences

NEURAL NETWORKS

ARTIFICIAL INTELLIGENCE

MACHINE LEARNING

Proprietary access control and management system on the TRASSIR platform

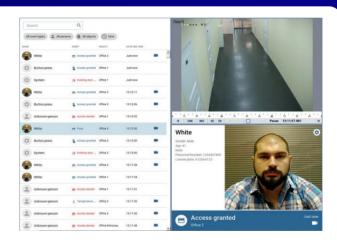

The system includes access management, event registration and analysis report generation, and employee timekeeping. The video analytics and intercom integration capability provides all the benefits of access control systems and smart video surveillance together in the TRASSIR platform.

Proprietary line of access control equipment: low-cost network controllers and readers.

Possibilities

- Human resource management
- Temperature-based access control
- Photo/Video identification

- Access level configuration
- Equipment setup and management
- Multi-factor authentication
- Flexible work and access schedules
- Building analysis reporting
- Configure flexible responses to system events
- Manage visitor passes
- Work in mobile app and browser

Advantages

Comprehensive solution

One server for one system - VMS and ACS on one server

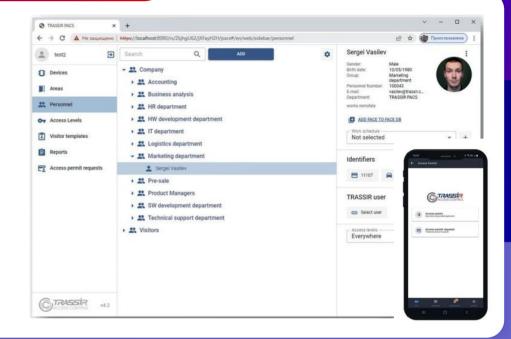

Transparent pricing

Key differences from other access control systems

- Multivendor ACS (TRASSIR, HikVision, HiWatch, ZkTeco, TrueIP)
- Integrated security system (CCTV, video and event analytics, fire alarm system,
- ACS, intercom, cloud technologies)
- Client customization available (Rules, Scripts, Open API)
- Economy and simplicity
 - No need for an additional server
 - One license for all features and a user-friendly interface

TRASSIR Cloud

Cloud-based video surveillance as an efficient, all-purpose tool for setting up systems of any scale. TRASSIR Cloud CCTV is a carrier-grade plugand-play value-added service developed for telecoms/ISPs/Enterprises to extend their service portfolios, grow userbases, and secure additional revenue streams through cloud-based video surveillance for SMB and private subscribers.

TRASSIR CLOUD characteristics in accordance with partners

95% Quick setup

99% Good technical support

87% Convenient software

90%

Easy to learn

80% Competitive pricing

White Label partnership program

- A new revenue generation channel
- A new user communication channel
- Expanded eco-system, digital transformation
- Set up custom plans and productbased 'promo packages' as tools for boosting sales
- No need to pay for service development: using the TRASSIR cloud product we identify user needs and customize servers together

TRASSIR Cloud

TRASSIR Cloud CCTV is a carrier-grade plug-and-play value-added service developed for telecoms/ISPs/Enterprises to extend their service portfolios, grow userbases, and secure additional revenue streams through cloud-based video surveillance for SMB and private subscribers

Mobile App features

Connection of cameras and video recorders by IP address or via the cloud

Receive PUSH notifications from video analytics

View live and archived video

Working with ACS: ability to issue temporary guest passes, manually open doors

View server health indicators

TRASSIR CMS

Extensive video surveillance system management solution created for the closed IT loop of large customers

Unified user management, LDAP

Centralized sever management and updating

Video surveillance equipment health monitoring

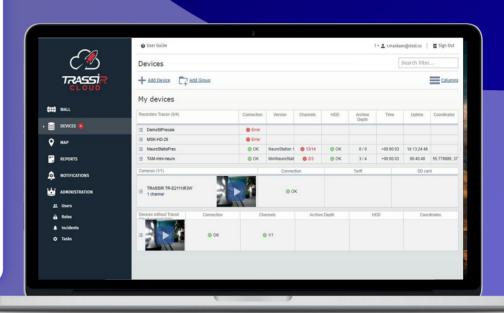

Access to both web interface and mobile app

Internet traffic saving

Situation centre

TRASSIR CMS is designed for

Over 1000 devices

Multiple locations

When 24/7 system monitoring is required

OUR CLIENTS AND PARTNERS ACROSS THE GLOBE

Kuwait National Guard

CERTIFICATION

TRASSIR equipment meets EU safety standards and other applicable requirements (CE certification)

- ✓ Electromagnetic compatibility
- ✓ (EMC)
- ✓ Low Voltage Directive (LVD)
- ✓ RoHS Directive
- ✓ Radio Equipment Directive

Additional certificates can be obtained to meet the requirements of a specific customer's case or upon a partner's request
