

The TRASSIR logo is positioned in the upper left corner of the image. It features the word "TRASSIR" in a bold, white, sans-serif font, followed by a stylized graphic of horizontal lines of varying lengths that resemble a signal or data stream. The background of the entire image is a semi-transparent blue overlay over a photograph of a computer monitor displaying a software interface. The interface includes a top navigation bar with tabs for "Живой" (Live) and "Архив" (Archive), and a main window showing a call log for "Talking to 7868...". The call log table has columns for "Колл" (Call), "Дата" (Date), and "Длительность" (Duration). The background also shows a blurred image of a person's face on the right side.

TRASSIR®

TRASSIR SIP Intercom

The security system for concierge,
intercom of residential complexes

История звонков:

Все Входящие Исходящие Пропущенные

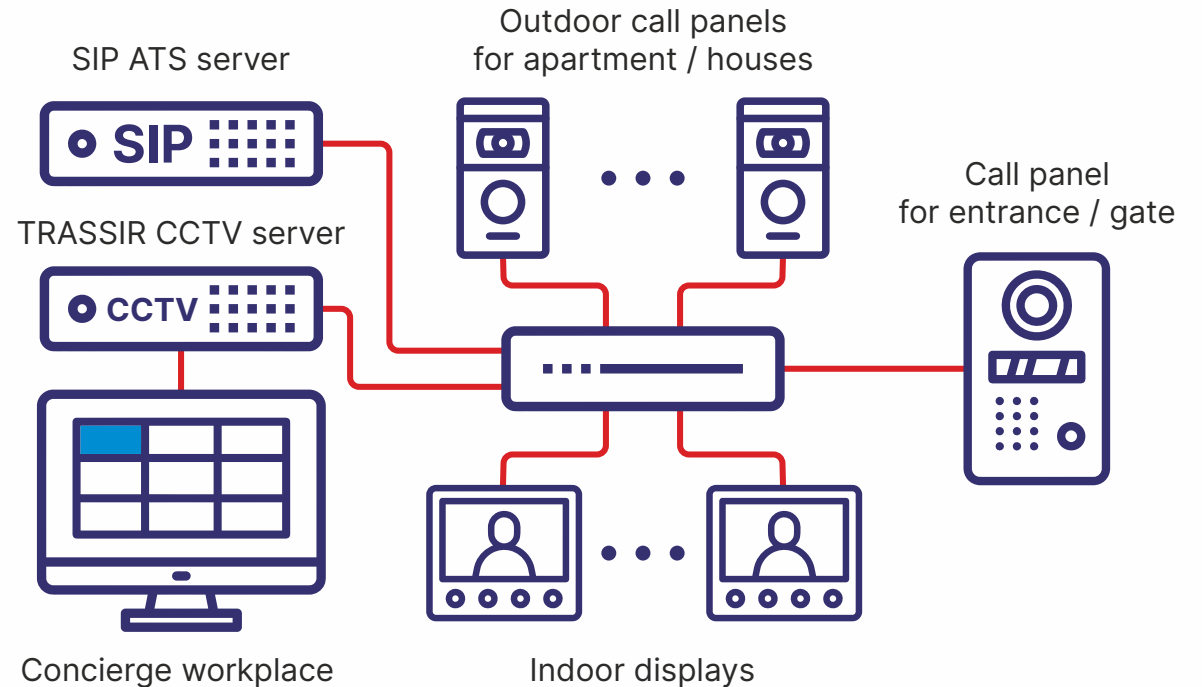

Колл	Дата	Длительность
7868	14.07.2020 16:05:35	00:00:00
7868	14.07.2020 16:05:35	00:00:00
7868	14.07.2020 16:01:48	00:00:39

The security system for concierge, intercom of residential complexes

The TRASSIR module, integrate SIP intercoms, is a high-level comfort and security in the house.

Professional video surveillance has been combined with intercom to intelligently build software that would allow not only to record incoming calls but also storage the archive. A stable connection carried out through the TRASSIR server ensures the reliability of the structure. The ease of registration and installation of the program will help to establish a security system in the facility in a short time.

TRASSIR Intercom module is an innovative convenient solution in terms of protection for yourself, your loved ones, and the company. TRASSIR Company gave pride of place to two characteristics while creating the Intercom module: simplicity and reliability. This is what our software is.

Goals, ensured by TRASSIR

When developing the TRASSIR Intercom module, TRASSIR Company has set several goals that the software provides:

- The ease of registration and use;
- The stability of the system under a diverse load;
- The wide range of usage possibilities;
- The ability to record conversations;
- The large archive with a search function;
- The maintenance of a high level of client security.

The advanced technologies that were used in the development of the Intercom module successfully cope with the goals put by TRASSIR Company and set a high bar in the field of security.

The features and functionality of the TRASSIR Intercom module

The TRASSIR high-level security software for SIP intercoms has a wide list of features:

- Call recording and archive management;
- The archive search by:
 - calls;
 - user telephone number;
 - type of call (outgoing, incoming, missed);
 - duration of the conversation;
 - date;
 - time;
 - movement in the zone (ActiveSearch);
 - detection (if the user has access to the Video Intercom module);
- Auto-monitoring of serviceability of user devices;
- Notifications in case of problems;
- Connection of SIP intercoms, SIP phones, SIP softphones, mobile SIP applications, etc.;
- Synchronization of video/audio data from call panels and video surveillance system devices.

Tasks that the features solve

Thanks to the TRASSIR for SIP intercoms, a new level of protection is provided. It is enough to call the required number, and the software will connect you to the operator using the TRASSIR server. The archive keeps the data about the calls and helps to search the information fast. Open the door, forward an incoming call or talk to another operator or user - now is easier than ever.

The TRASSIR Intercom module successfully deals with high network load, is easy to use, and regulates the features that the server operator is assigned to. We put in the software a number of fundamental tasks for the comfortable usage of the program. However, the main one is to keep a high level of security in the places of installation with a help of modern technologies and sophisticated functionality which TRASSIR Company has developed in the TRASSIR Intercom module.
