- The video stream is synchronized with the POS operations to verify that a receipt is printed every time, prevent discount/loyalty card fraud, detect suspicious activities, investigate accidents, and improve the corporate culture

Solution:

Professional
TRASSIR video surveillance system +
Active POS smart module

The professional video surveillance system from TRASSIR integrated with its smart modules **improves customer service, prevents losses, and customer dissatisfaction, and reputational damage**

Features:

- Compliance checks
- Tracking attended and unattended customers
- Customer server wait time reports

Solution:

TRASSIR Neuro Detector
smart module

TRASSIR Video Analytics for Catering Industry

Features:

- Working hours/attendance monitoring

Solution:

Workplace Detector Video Analytics Module

Features:

- VIP client detection “at the doorstep” to offer them premium service

Solution:

Face Recognition Video Analytics Module

Security and working time keeping

Features:

- ➔ Automated employee entry
- ➔ Blocking unauthorized access
- ➔ The site is divided into areas
- ➔ Fraud-proof working time keeping
- ➔ Better Security
- ➔ An intruder is stored in the database and an alarm is activated upon their re-entry

Solution:

TRASSIR Face Recognition
Smart Analytics Module

TRASSIR Professional Video Surveillance System integrated with the video analytics smart modules **tracks visitors and visitor to customer conversion rate**

Features:

- Attendance count

Solution:

Neuro Counter smart module

Features:

- Visitor to customer conversion rate estimation

Solution:

Active POS module integration
