

PARKING PAYMENT CONTROL

Monitor vehicles and parking payment without
the use of parking equipment

Problems

- Low occupancy
- Profit loss
- No occupancy data
- High cost of parking equipment

Solutions

95-99% license plate recognition accuracy

Reduce spending on parking equipment

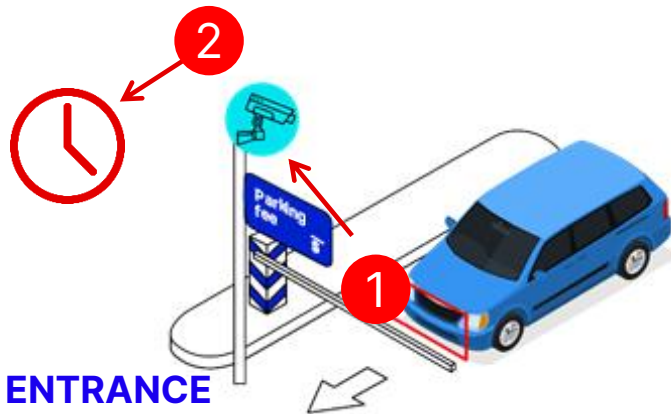

Analytics and reports

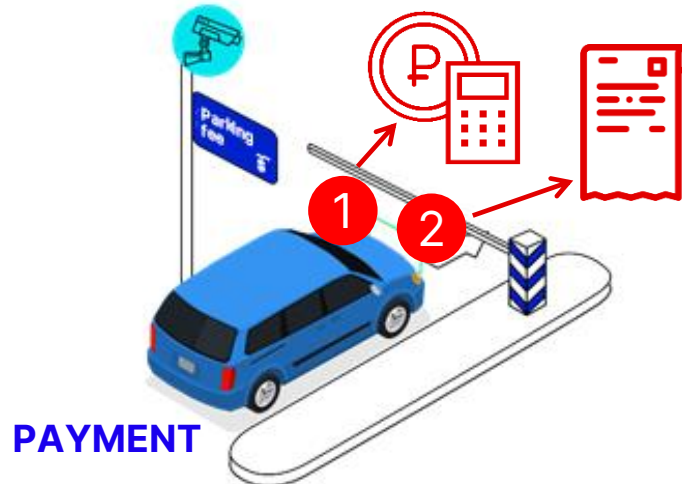

Dynamic pricing

► How it works

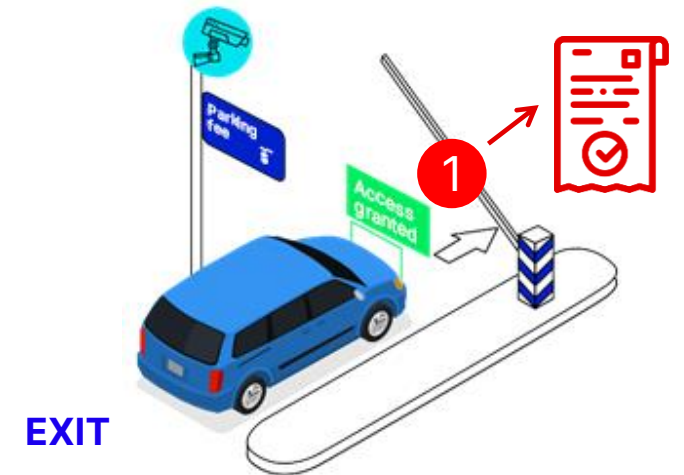

Collects 100% of parking zone payments

- 1 Automatically recognizes vehicle license plates
- 2 Records time of entrance into the parking area

- 1 Automatically calculates parking fee
- 2 Pay for parking by license plate
Cash / QR* / App*

- 1 Verifies payment status by license plate

► Applications

Paid parking

Residential
complexes

Business centers

Hotels and restaurants

Shopping centers

► Automated parking without using passes, guards, or parking equipment

Entrance by license plate
without passes,
RFID tags, or security guards

**Check-in and
check-out times**

Dispute resolution

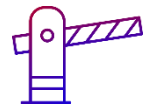

Savings on parking
equipment, paper receipts,
plastic cards

**Monitoring of all
entrances** to the
territory

Reduction of mistakes
due to human and
manual errors

Implementation
with existing parking
barriers/gates

Elimination of theft in
collusion with security
guards

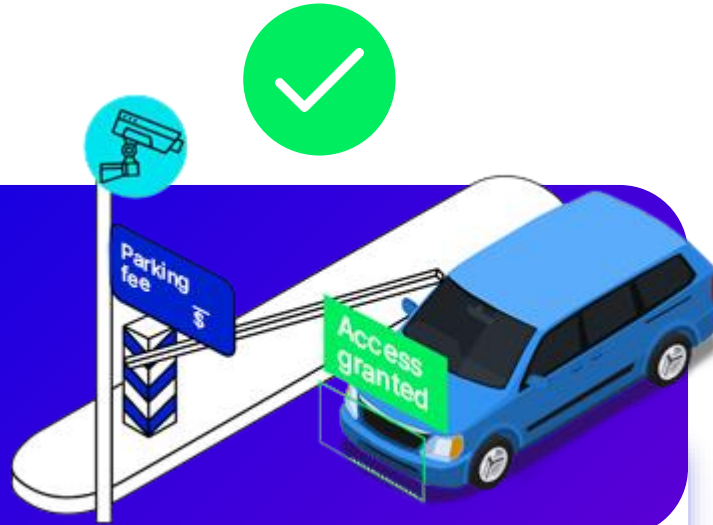

Accounts for vehicle type

Reduction in number of
guards

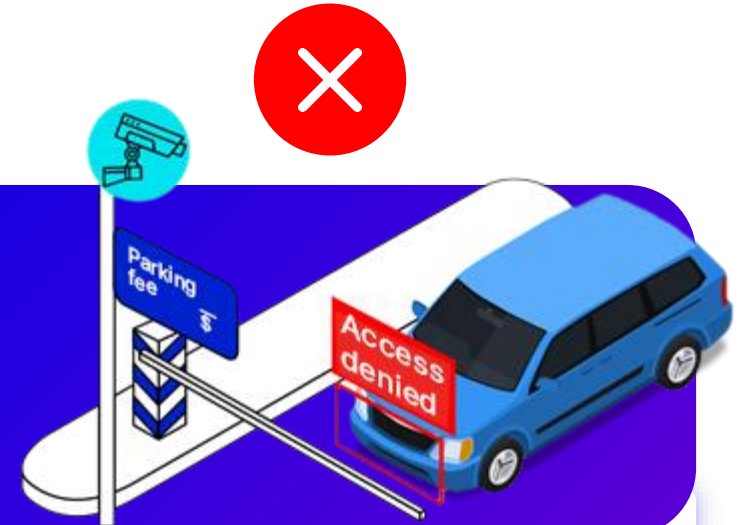

► Entry list management

White list of regular residents

Automatically admit vehicles whose license plates are in the database using the option to prepay, or pay at the end of the parking period

Black list of violators

Prohibit admission of vehicles which have previously violated the rules

► Dynamic pricing

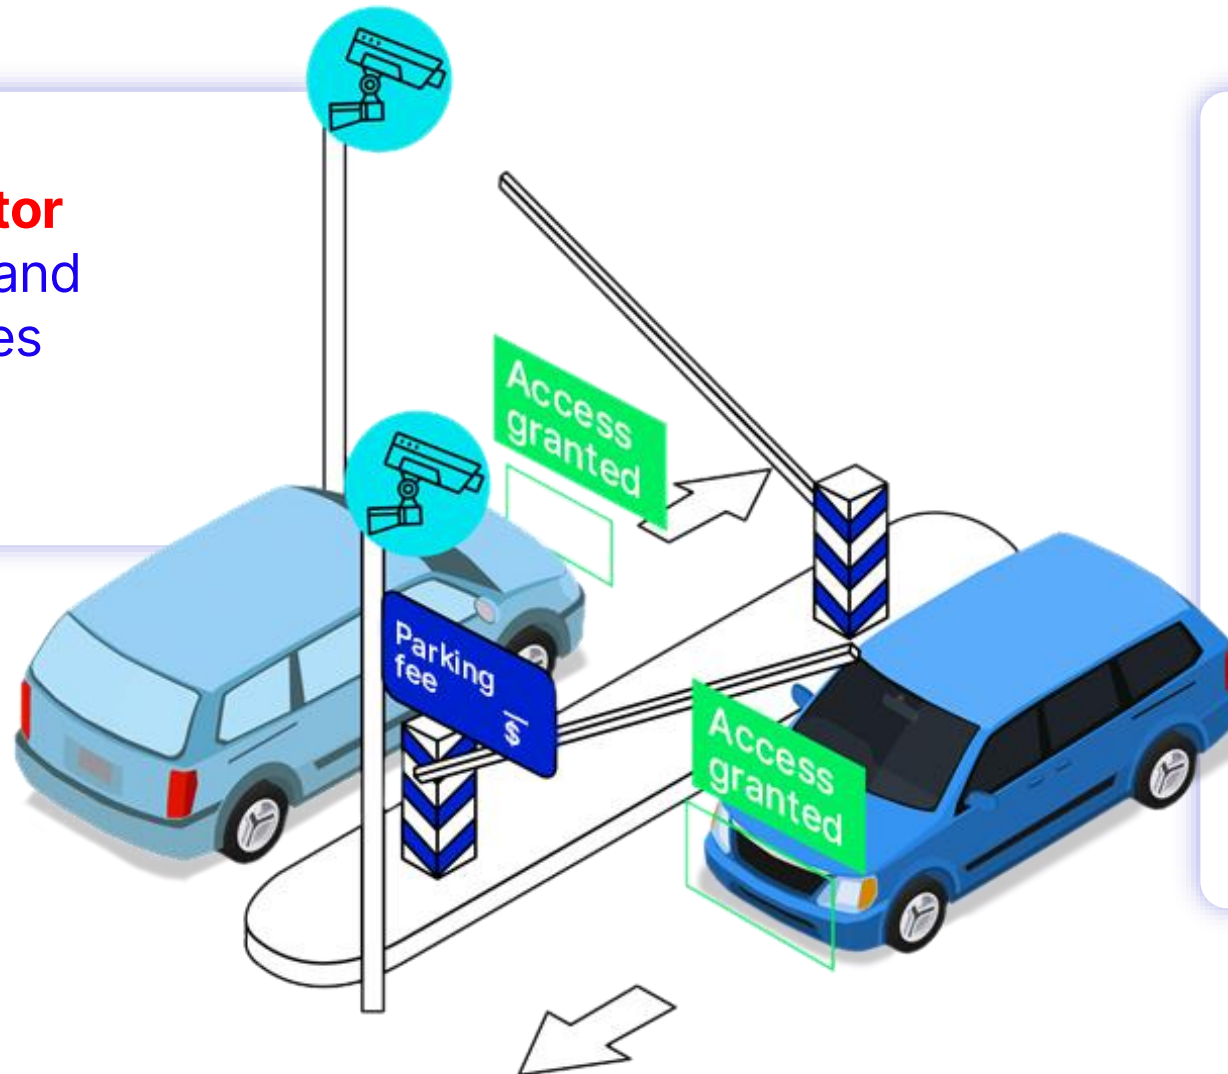

Customizable rate:
hourly

Accounts for free
time of stay

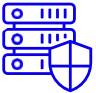

► Detailed occupancy and finance reports

Helps monitor
occupancy and
manage rates

Keeps a record of cars entering and exiting the parking area, records license plate numbers, as well as photo and exact time of entry and exit, time spent in the parking area, and cost for separate parking

► Solution features

Equipment	Analytics
 Security cameras	 AutoTRASSIR Automatic license plate recognition
 NVR	 TRASSIR Parking Payment Control Monitor entry to the territory and payments TRASSIR Parking Analytics Parking analytics dashboard

All TRASSIR elements are united into a single information space with a centralized management server

Parking analytics modules work only with the AutoTRASSIR license plate recognition module

As the number of tasks increases, it is possible to scale the system and add new functionality
